

MAINPOINT APARTMENTS - MELBOURNE, VIC

Architect: Doig Architecture

BACKGROUND

GWA provided a complete solution for Central Equity's landmark 43-level MainPoint Apartment complex in Melbourne. Ian Carkeek, General Manager - Product and Development at Central Equity said, "The GWA Bathrooms & Kitchens range suited our design concept while at the same time achieving key practical and environmentally sustainable requirements. This, in addition to our long standing, first-hand experience using their products meant it was an easy choice for us."

CHALLENGES

MainPoint Apartments comprises 350 apartments in configurations including one bed plus study, two and three bedrooms. GWA supplied a full schedule of fittings across the board, featuring tapware, sinks, toilet suites and other bathroom accessories.

SOLUTION

The Hansa Prado Neu range of mixers was installed in the kitchens and bathrooms, combining functionality and durability with an aesthetic, understated form - not to mention a 4-star WELS rating.

The Caroma Liano Semi-recessed Vanity Basin was installed in the bathrooms, as well as the wall faced Stylus Venecia toilet suite and the Hansa Ecojet Neu 3 rail shower, with its three stream patterns and an integrated soap dish.

The MainPoint Apartment project is a great example of how GWA combines design, aesthetics and product functionality to create a total solution.
